

SSE Enterprise Telecoms the smart connectivity choice

Fast, reliable network connectivity not only drives productivity and innovation, it physically underpins our economy. We support government ambitions to build world-class digital infrastructure across the UK.

We work with central and local government bodies to actively encourage and facilitate the deployment of full fibre and 5G mobile network infrastructure to help our public services run more efficiently and cost-effectively.

Our mission is connectivity delivered better.

A high-bandwidth UK network

With robust, high-capacity dark fibre, optical and Ethernet network solutions in our portfolio, choosing us as your network provider means access to more than:

12,000 KM
expanding fibre network across the country

265+
points of presence

High-speed growth ahead

Backed by SSE plc and leading infrastructure investor, Infracapital, SSE Enterprise Telecoms is investing heavily to help expand and develop network infrastructure across the UK.

We're willing to co-invest in network assets and utilise PIA with our local authority customers, to make our cities and local communities better connected places.

80+
data centres

200+
high-capacity
unbundled exchanges

Making the complex simple

“The relationship between Jisc and SSE Enterprise Telecoms originated in the early 2000s and, nearly 20 years later, the relationship continues to grow from strength-to-strength. A substantial level of trust has built up between our two companies.”

Jeremy Sharp
Janet Infrastructure Director, Jisc

We'll make it simple for you to implement the network solutions you need, however complicated they are, because we know how to make technology change happen.

We have proven national network infrastructure capability including responsibility for mission-critical services.

Peace of mind

Safety, security and performance are paramount in our network operations and we have a strong service delivery reputation backed by class-leading average NPS scores.
